
Property Management System Interface

The Property Management System Interface (PMSI) is an optional feature available on Generic X11 Release 10 and later. The PMSI program monitors call processing continuously and outputs problems in the form of PMS messages.

PMS messages

- | | |
|---------|--|
| PMS0610 | PMS input/output block pointer does not exist. |
| PMS0611 | PMS link does not exist. (eg, no unprotected data) |
